

# UPHIGH ONLINE

TEMPORAL-POWERED AUTOMATION BACKEND

Developed by Abigail Sanchez

# Overview

UPHIGH ONLINE is a Durable Execution Backend built on Temporal - used by leaders like Stripe and Netflix. It automates tasks with guaranteed reliability. Even if servers crash or a human approval is delayed, Temporal ensures completion once and only once.

Key Capabilities:

- Multi-step processes with rollback (Saga Pattern)
- Human-in-the-Loop approvals
- Node.js and Python SDKs included
- Integrates with Stripe, PayPal, Wix, Base44
- Live dashboard to monitor, approve, and audit workflows

## Pricing Tiers

Starter License - \$199

Core backend + setup guide + sample workflow

Pro License - \$599

Full codebase + dashboard UI + Stripe/Wix integration + onboarding

White-Label Enterprise - \$1,500 - \$3,000

Custom branding + multi-tenant support + cluster setup + priority support

Optional revenue-share: 10% of processed volume via Stripe split.

## Setup Summary

1. Choose Node.js or Python worker.
2. Configure Temporal Namespace and Task Queue.
3. Run 'npm run worker' or 'python worker.py' to start the backend.
4. Use the dashboard to approve manual orders and track workflow state.
5. Connect Stripe, PayPal, Wix, or Base44.
6. Deploy to Temporal Cloud for production.

## Disclaimer

UPHIGH ONLINE is a digital automation system for business operations.  
It does not guarantee financial or gaming results. Examples and integrations are provided as templates.
